

Soft

Fabric softener

More than just clean clothes

Nowadays it is not only enough that the clothes get clean. People want their clothes to smell good and to feel soft and fresh. NeoLife Soft gives clothes and textiles the required fresh smell and softness in a handy and efficient way.

It does not only make the laundry soft, it also prevents static electricity and makes the laundry easy to iron. NeoLife Soft is fluid and can be added when rinsing either when hand or machine washing.

Instruction for machine wash

Add NeoLife Soft to the last rinse and it should be used according to the instructions on the bottle.

1 part of NeoLife Soft mixed with two parts of water is dosed for:

3–4 kg machine, three capfuls

5–6 kg machine, six capfuls

NeoLife Soft Concentrated is dosed for:

3–4 kg machine, one capful

5–6 kg machine, two capfuls

Hand wash

Add to 10 litres of water in the last rinse:

Two capfuls of mixed NeoLife Soft or One capful concentrated NeoLife Soft.

Carpet antistatic

Pour a few drops of concentrated NeoLife Soft into a hand spray-bottle (1/2 litre) and fill it with water. Adjust the spray gun so that it gives a fine jet. Do not soak the carpet. Several light sprays is better than a heavy one.

Note: Can be damaged if frozen. When defrosted the product becomes “lumpy” and not completely soluble in water.

Demonstration

- Show the product.
- Pour the product into a small transparent glass and let it circulate among the guests together with a bottle so that they can smell and feel the product.
